

We hope this website can convey an idea of DEFINITY's outstanding image quality, and the technology behind it.

But, of course the final proof will be in the film quality you get out of your very own footage. We very much encourage you to send us your test material which we will turn around as quickly as possible.

Alternatively, you can also order a set of negative test charts and prints with sample life sequences recorded on DEFINITY,

or we will recommend a feature film recorded on DEFINITY running at a cinema near you.

Our team will be delighted to arrange a test run for you: [info@ccg-digital.com](mailto:info@ccg-digital.com) .
